Subject: Disclosure of Material Information

Dear Sirs,

In accordance with Sections 96 and 131 of the Securities Act, 2015 and Clause 5.6.1 of the Rule Book of the Pakistan Stock Exchange Limited, we are pleased to convey the following information regarding our associated company, National Resources (Private) Limited ("NRL"), in which Fatima Fertilizer Company Limited (the Company) holds a 33.33% equity stake:

"NRL has identified copper and gold mineralisation across at least eight porphyry discoveries spanning approximately 5.6 square kilometres in Darigwan, adjoining its earlier Tang Kaur discovery in Balochistan's Chagai district. Approximately 25,000 meters of drilling have delivered encouraging results.

NRL is progressing towards its first Mineral Resource Estimate in accordance with international standards and plans to commence further environmental, hydrogeological, metallurgical and geotechnical studies in 2027, targeting completion of a bankable feasibility study by the end of the decade. Further investigations are expected to establish resources, subject to completion of exploration and formal resource estimation.

NRL has also reaffirmed its previously announced commitment of USD 100 million investment towards mineral exploration in Pakistan and plans to bring additional national and international investors into the project as required. NRL currently holds five exploration licences in Balochistan, comprising two copper-gold licences, one lead-zinc licence and two antimony licences.

NRL is committed to developing local expertise and supporting education and community development in Balochistan through the newly established Chagai Foundation.

The Company shall continue to provide updates as progress continues."

You may please inform the TRE Certificate Holders of the Exchange accordingly.

Yours sincerely,

Anil Zia
Deputy Company Secretary
